PERSONAL PROFILE

I am a Computer programmer and designer. I aspire to be a premier mobile developer and user experience designer of a brand in Kenya. To achieve this objective, learning from already existing brands, professionals and firms is a worthy road map. I possess versatility, charisma and thrive well in fast moving environments. I maintain the focus to meet and exceed set objectives and promote good governance in ethics and moral values. I am driven by passion.

EDUCATION

2016(January) – 2016(December) Diploma in computer programming Akirachix

Relevant modules

- Mobile development.
- Frontend development.
- Backend development.
- Graphic design.

2011-2014 - Kenya Certificate Of Secondary Education Our Lady Of Mercy High School

- Mean grade (B-)

WORK EXPERIENCE

2016(August) - Intern (Shimba Mobile Technologies)

Worked as a quality analyst and a material designer at Safaricom, I managed to test and analyze three mobile applications before they were deployed.

2016(April) - Volunteer (Akirachix)

Taught the kids between the Ages of 8-14years on how to make their first website pages using the programming languages HTML and CSS, The kids also learnt how to code with Arduino.

INTERESTS

I enjoy Video games and puzzle solving mostly with friends and family.

I enjoy creating fun hardware firms with Arduino and Raspberry pi.
